(for Bleacher Reacher Pro)

3.5 oz Co2 Tank
(for Streamer Beamer)

Extra CO2 Tank with On/Off Valve
(for Micro Mini and Ball Shooter)
(for Deuce, Sabre, and Mega)

12 Gram Co2 Cartridges
(for Streamer Beamer)

O Rings - O Rings are used to seal your CO2 bottle into your marker, occasionally they become damaged, worn and will need replacing. Our O Rings are of the highest quality and come in packs of 10.

Replacement Gauge

Digital Scale
This optional accessory allows you fill your own CO2 tanks by weighing them accurately

Rubber Bands (pack of 100)
(used for rolling t-shirts)

Basic Co2 Fill Station

Deluxe Two Valve CO2 Cylinder Fill Station w/CO2 Pin Depressor. This has two carbon steel ball valves for maximum filling performance. This is perfect for all high volume CO2 filling without muffler

Quick-Disconnect Hose

This optional accessory allows you to connect your launcher directly to a bulk CO2 tank, providing a direct and continuous air source without the use of a CO2 tank. The quick disconnect comes with a 2-piece adapter that screws directly into your launcher where the CO2 tank usually goes and a braided hose with air fitting to adapt directly to a bulk tank

Coiled Remote Hose

A remote hose is really just a coiled hose that allows you to attach your launcher to your co2 tank without having to have the tank directly attached to your launcher. Works well with a backpack holding your CO2 tank.
